

FOR IMMEDIATE RELEASE:

Godlyke releases HAO Premium Workshop “Omega Drive Sixteen” overdrive pedal

Godlyke is proud to announce the release of the **HAO Omega Drive Sixteen** overdrive pedal. The first model in the **HAO “Premium Workshop”** series of professional-grade effect pedals, the **OD-16** is a significant step forward from **HAO’s** previous product offerings, including a complete cosmetic overhaul. The **OD-16** is the culmination of several years of research and development by the new **HAO** engineering staff, which included significant input from Japanese guitarists and other industry professionals.

Named for its internal voltage doubling circuit, the **Omega Drive Sixteen** takes an incoming power supply of 9-volts DC and converts it to 16-volts DC, dramatically improving headroom and dynamic responsiveness. The tonal character of the **OD-16** is more aggressive than the standard “Tube Screamer” overdrive, consisting of tight and punchy lows and lower mids along with rich, sparkling harmonic overtones. The **OD-16** reacts very fast to picking dynamics, offering an incredible touch-responsive overdrive that perfectly complements advanced playing techniques.

HAO Omega Drive Sixteen features include:

- Volume, Tone, and Gain controls
- Direct Tone Bypass Switch
- True Bypass Switching using 3PDT
- Internal voltage doubling circuitry
- Compact, cast-aluminum enclosure
- Ultra-bright status LED
- 9-volt Battery or AC adaptor operation
- 3-year limited warranty

The **Omega Drive** List/Street Price is **\$349/\$260**. For more information on the **Omega Drive Sixteen** and the complete line of **HAO** products, visit our website at www.godlyke.com or call us toll-free 1-866-246-3595 (973-777-7477 for international callers).
